27.—(1) For the purpose of the reports required under section 26 or in any references to the property of the company contained in either Form 16 or Form 17, where the report relates to, or reference is made to, the property of a mining company or a mining exploration company,

- (a) "ore" means a natural aggregate of one or more minerals which, at a specified time and place, may be mined and sold at a profit or from which some part may be profitably separated;
- (b) "proven ore" or "measured ore" means that material for which tonnage is computed from dimensions revealed in outcrops or trenches or underground workings or drill holes and for which the grade is computed from the results of adequate sampling and for which the sites for inspection, sampling and measurement are so spaced and the geological character so well defined that the size, shape and mineral content are established and for which the computed tonnage and grade are judged to be accurate within limits which shall be stated and for which it shall be stated whether the tonnage and grade of proven ore or measured ore are *in situ* or extractable, with dilution factors shown and reasons for the use of these dilution factors clearly explained;
- (c) "probable ore" or "indicated ore" means that material for which tonnage and grade are computed partly from specific measure-

ments, samples or production data and partly from projection for a reasonable distance on geologic evidence and for which the sites available for inspection, measurement and sampling are too widely or otherwise inappropriately spaced to outline the material completely or to establish its grade throughout;

- (d) "possible ore" or "inferred ore" means that material for which quantitative estimates are based largely on broad knowledge of the geologic character of the deposit and for which there are few, if any, samples or measurements and for which the estimates are based on an assumed continuity or repetition for which there are reasonable geological indications, which indications may include comparison with deposits of similar type and bodies that are completely concealed may be included if there is specific evidence of their presence;
- (e) estimates of possible ore or inferred ore shall include a statement of conditions within which the inferred material occurs; and
- (f) the arithmetical average of any amount of sampling is not necessarily representative, unless the distribution of values and number of samples are properly taken into account and a statement of how samples were taken shall be given and where mineralization is erratic, the method of treating erratic values, shall be given in the narrative of the report.

(2) For the purpose of the reports required under section 26 or in any reference to the property of the company contained in Form 16 where the report relates to, or reference is made to, the property of an oil or gas company,

- (a) "crude oil" is a mixture that consists mainly of pentanes and heavier hydrocarbons, which may contain sulphur compounds and that is recoverable at a well from an underground reservoir and that is liquid at the conditions under which its volume is measured or estimated and includes all other liquid hydrocarbons so recoverable except natural gas liquids;
- (b) "natural gas" is a mixture, consisting principally of hydrocarbons that may contain non-hydrocarbon gases such as carbon dioxide, hydrogen sulphide or nitrogen, which mixture is recoverable from an underground reservoir and is in the gaseous phase or in solution with crude oil in the reservoir;
- (c) "natural gas liquids" are the hydrocarbon components propane, butanes, and pentanes plus, or a combination of them, which

hydrocarbon components are subject to recovery from raw gas as liquids by the processes of condensation or absorption, which recovery takes place in field separators, scrubbers, gas processing and reprocessing plants or cycling plants;

- (d) "commercial production" is output from a well of such quantity of petroleum substances as, having regard to the cost of drilling and production and the price, kind and quality of such production, would justify from a commercial and economic point of view the drilling of a similar well in the immediate surroundings;
- (e) "proved reserves underlying a property" are the estimated economically recoverable quantities of crude oil, natural gas and natural gas liquids, including the reserves to be obtained by enhanced recovery processes demonstrated to be successful, from that portion of an area delineated by gas-oil or oil-water or gas-water contacts in drilled wells or which can be reasonably evaluated as economically productive, on the basis of drilling, geological, geophysical and engineering data, but reserves in undrilled prospects cannot be classed as proved reserves;
- (f) "proved developed reserves" are those proved reserves which will be produced from existing wells or facilities;
- (g) "proved undeveloped reserves" are those proved reserves which are not recoverable from existing wells or facilities or from those zones in existing wells which have been cased-off, but which can be recovered through the drilling of additional wells;
- (h) "probable reserves" of crude oil, natural gas and natural gas liquids include proved reserves plus an estimate of any additional reserves which may be recovered from the known pool or from that portion underlying the properties. The estimates of probable reserves are as realistic as can be determined on the basis of the information available. The area considered probable shall be the estimated ultimate size of the reservoir or of that portion underlying the properties including the proved area and shall be based on a realistic interpretation of the geological or geophysical, or geological and geophysical data available at the time the estimate is made, probable reserves to be obtained by the application of enhanced recovery processes include proved reserves, reserves from the additional probable area and increased recovery over and above that recognized in the proved category which can be realistically estimated to be ultimately economically recovered from the pool or such portions as underly the properties.

5. Section 27a of Regulation 794 of Revised Regulations of Ontario, 1970, as made by Ontario Regulation 182/71, is revoked and the following substituted therefor:

27a. The escrow agreement referred to in paragraph 12a of subsection 2 of section 19 and in clause d of subsection 1 of section 61 of the Act shall be made in accordance with Form 16A for a mining or oil company and in accordance with Form 17A where required for any other type of company and a transferee of shares which are subject to the terms of an escrow agreement shall sign an acknowledgement in accordance with Form 17B and file it with the Commission within ten days of the date of the Commission's consent to the transfer within escrow.

Treasurer's Sale of Lands for Taxes

Each year, municipal and county treasurers compile a list of properties against which taxes are outstanding for at least two successive years, which is a period sufficient to permit sale of the owner's assets to reimburse the municipality. These lists are submitted by the municipal representative to the Queen's Printer and Publisher for publication in THE ONTARIO GAZETTE.

The Gazette is published every Saturday. Tax sale lands are included only in the issue of the first Saturday of each month. Each property is described so that it may be properly identified. Also shown are the amount of tax arrears and costs, and the date, time and place where the sale will be held, which is usually in a public building in the locality. Sales are held three months or later following the date of publication in the Gazette and are subject to a reserve bid equal to the amount of tax arrears and costs.

The previous owner may by law redeem the property any time within one year and one day after the date of tax sale by paying to the municipality all arrears plus costs levied. Where redemption occurs, the municipality reimburses the purchaser of tax sale lands for the amount paid at the sale plus an additional amount to be determined in each case.

If the land is not redeemed in the manner described above, the purchaser at sale, receives from the municipality a tax deed or certificate which should be registered in the appropriate Land Titles or Registry Office. A purchaser should ascertain from either of these offices, information relating to any of the charges or liens against the land and consider the advisability of employing the services of a solicitor to determine the extent, if any, of his liability.

The foregoing applies to tax sale lands which were privately owned. In the event the land is the property of the Crown as represented by the Province of Ontario, only the improvements on the property, such as buildings, may be sold. In this case, an intending purchaser should for his own protection ascertain from the local office of the Department of Lands and Forests whether or not the land or any part can be purchased or leased from the Department. If it cannot, then the purchaser of the improvements would be required to remove them from the land.

In some cases, land advertised for sale in the Gazette may be bought by the municipality, or the owner, prior to sale, may pay the tax arrears and costs. Where this occurs, the land is removed from the tax sale lists.

ASPHALT PAVING PLANTS

1. (a) "aggregate material" means any material or materials, including, but not limited to, gravel, slag, limestone, crushed rock, sand, hydrated lime, cement, furnace ash, asbestos, glass or sulphur, or any two or more of them, used to produce asphalt paving when mixed with bituminous asphalt;
- (b) "asphalt paving plant" means equipment designed to dry aggregate material and to mix the aggregate material with bituminous asphalt;
- (c) "fine material" means that portion of aggregate material that will pass through a number 200 sieve as designated in the American Society for Testing Materials publication number ASTM-E-11-61;
- (d) "permanent asphalt paving plant" means an asphalt paving plant that remains at one location for more than one calendar year;
- (e) "portable asphalt paving plant" means an asphalt paving plant that remains at one location for less than one calendar year.
O. Reg. 183/72, s. 1.

2. No person responsible for a portable asphalt paving plant shall operate or permit the plant to be operated so as to emit solid material into the air,

- (a) at a rate greater than that derived, by measurement or calculation, from the application of the following formula:

$$E = \frac{A}{B} \times 1.67 \times C$$

Where: E is the amount of solid material emitted in pounds per minute

A is the actual operating rate of production of the plant at the time of testing in tons per hour

B is the maximum designed rate of production of the plant as stated by the manufacturer of the dryer in tons per hour corrected to a moisture content of 5 per cent

C is 1, except that where the material processed contains less than 5 per cent of fine material by weight, C is the actual percentage of fine material contained in the material processed divided by 5 per cent; or

- (b) at a greater rate than 1.67 pounds per minute,

whichever is the lesser. O. Reg. 183/72, s. 2.

3. No person responsible for an asphalt paving plant shall operate or permit the plant to be operated so that visible solid material, a water plume or fallout of water droplets emitted into the air from the asphalt paving plant impinges on any point beyond the limits of the property on which the asphalt paving plant is located. O. Reg. 183/72, s. 3.

4. No person responsible for an asphalt paving plant shall permit visible solid material emitted from any source other than the asphalt paving plant to pass beyond the limits of the property on which the asphalt paving plant is located. O. Reg. 183/72, s. 4.

5. No person responsible for a permanent asphalt paving plant shall operate or permit the plant to be operated so as to emit solid material into the air,

- (a) that will, at any point of impingement, result in a concentration of solid material, measured or calculated, equal to or greater than that derived from the application of the following formula:

$$F = \frac{A}{B} \times 100 \times C$$

Where: F is the calculated average concentration of solid material at a point of impingement in micrograms per cubic metre of air for a thirty-minute period

A is the actual operating rate of production of the plant at the time of testing in tons per hour

B is the maximum designed rate of production of the plant as stated by the manufacturer of the dryer in tons per hour corrected to a moisture content of 5 per cent

C is 1, except that where the material processed contains less than 5 per cent of fine material by weight, C is the actual percentage of fine material contained in the material processed divided by 5 per cent; or

(b) that will result in a concentration of solid material, measured or calculated, at any point of impingement of an average greater than 100 micrograms per cubic metre of air during a period of thirty minutes,

whichever is the lesser. O. Reg. 183/72, s. 5.

6. Regulation 10 of Revised Regulations of Ontario, 1970 is revoked. O. Reg. 183/72, s. 6.

TOTAL GUARANTEED PRODUCTION

4. The total guaranteed production is the guaranteed production per acre determined in accordance with the plan multiplied by the number of acres seeded to corn.

INDEMNITY

5. The maximum indemnity payable for a loss in production of corn is the amount obtained by multiplying the total guaranteed production by the established price prescribed by the plan.

PREMIUM

6. For each crop year in which the insured person seeds acreage to corn, a premium shall be paid, the amount of which shall be determined in the manner prescribed by the plan.

FINAL ACREAGE REPORT

7. In each crop year in which the contract of insurance is in force for corn, the insured person

shall file a final acreage report in the form and manner prescribed by the plan.

CROP YEAR

8. The crop year for corn is the period from the 1st day of March in any year to the 15th day of December next following.

FINAL DATE FOR SEEDING

9. Corn shall be seeded in each crop year not later than the date prescribed by the plan for the area in which the seeded acreage is situate.

HARVESTING OF SEEDED ACREAGE

10.—(1) All acreage seeded to corn shall be harvested as corn silage or grain corn unless the Commission, upon application therefor in writing, consents in writing to,

- (a) the use of the seeded acreage or any part thereof for another purpose;
- (b) the abandonment or destruction of the insured crop or any part thereof; or
- (c) the harvest of any insured acreage prior to the 5th day of September in any crop year.

(2) The harvesting referred to in subparagraph 1 shall be completed not later than the 15th day of December or such other date as may be determined from time to time by the Commission.

(3) Where the harvesting of any seeded acreage is not completed on the date prescribed by subparagraph 2, the insured person shall forthwith notify the Commission in writing and the Commission shall determine,

- (a) the number of unharvested acres and the potential production thereof; and
- (b) whether the harvesting of the seeded acreage was prevented by reason of one or more of the causes of loss insured against.

(4) Where an insured person fails to notify the Commission in accordance with subparagraph 3, no indemnity shall be paid in respect of the unharvested acreage.

(5) Where,

- (a) pursuant to subparagraph 1, any seeded acreage is used for a purpose other than harvesting as grain corn or corn silage; or
- (b) the harvesting of any seeded acreage was prevented by reason of a cause of loss not insured against,

the Commission shall determine the potential production of such acreage and such potential production shall be taken into account in the final adjustment of loss.

11. Where the Commission determines that harvesting of any seeded acreage was prevented by reason of one or more of the causes of loss insured against it shall determine the production of such acreage likely to be recovered by the insured person and such production shall be taken into account in the final adjustment of loss.

VARIETIES OF CORN

12. Except as otherwise determined by the Commission,

- (a) acreage intended for harvesting as grain corn may be seeded only to varieties of corn recommended in Publication No. 296 of the Ministry of Agriculture and Food entitled "Field Crop Recommendations" for the area in which the seeded acreage is situate;
- (b) acreage intended for harvesting as corn silage may be seeded to any licensed variety of corn offered for sale in Ontario.

EVALUATION OF LOSS

13. For the purpose of determining the loss in production of corn in a crop year and the indemnity payable therefor, the value of the crop shall progress through the stages prescribed in paragraphs 14, 15 and 16.

STAGE 1

14.—(1) Stage 1 comprises the period from the date on which the seeding of acreage to corn is completed to and including the 15th day of June in the crop year.

(2) Where loss or damage occurs in Stage 1, the Commission, upon application therefor in writing by the insured person, may consent in writing to,

- (a) the reseeding of the damaged acreage, provided that,
 - (i) for corn silage the variety of corn reseeded is one prescribed by paragraph 12 and that reseeding is completed not later than June 15th, and
 - (ii) for grain corn the variety of corn reseeded is one prescribed by paragraph 12 and that reseeding is completed not later than seven days after the date prescribed by Table 2 as the final date for seeding in the area in which the damaged acreage is situate; or

- (b) the use of the damaged acreage for any other purpose or to the abandonment or destruction of the insured crop on such damaged acreage and, in such case, the Commission shall determine the number of damaged acres and the potential production thereof.

(3) Where the damaged acreage is reseeded to corn in accordance with clause *a* of subparagraph 2, the contract of insurance shall continue to apply to such reseeded acreage.

(4) Where the damaged acreage is used for any other purpose or the insured crop is abandoned or destroyed in accordance with clause *b* of subparagraph 2, the amount of loss that shall be taken into account in the final adjustment of loss in respect of the total seeded acreage shall be calculated by multiplying,

- (a) 30 per cent of the guaranteed production for the damaged acreage; or
- (b) the difference between the guaranteed production and the potential production determined under clause *b* of subparagraph 2 for the damaged acreage,

whichever is the lesser, by the established price per bushel for grain corn and per ton for corn silage.

(5) Where the damaged acreage is not used for any other purpose or the crop thereon is not abandoned or destroyed after the Commission has consented thereto, the amount of loss calculated under subparagraph 4 shall not be taken into account in the final adjustment of loss.

(6) Notwithstanding any application made in writing by the insured person under this paragraph, the Commission may, where loss or damage occurs in Stage 1, notify the insured person in writing that it intends to terminate the insurance coverage on such damaged acreage and to calculate the amount of loss in the manner prescribed in subparagraph 4 with respect to such damaged acreage and, where notice of such intention has been given, the Commission shall calculate accordingly the amount of loss to be taken into account in the final adjustment of loss and the value of the insured crop on such damaged acreage shall not progress beyond Stage 1.

STAGE 2

15.—(1) Stage 2 commences on the 16th day of June in the crop year and, with respect to any part of the seeded acreage, ends with the completion of harvesting of such part.

(2) Where loss or damage occurs in Stage 2, the Commission, upon application therefor in writing by the insured person, may consent in writing to the use of the damaged acreage for any other purpose or to the abandonment or destruction of the insured

crop on such damaged acreage and, in such case, the Commission shall determine the number of damaged acres and the potential production thereof.

(3) Where,

- (a) damaged acreage is used for any other purpose or the insured crop thereon is abandoned or destroyed in accordance with subparagraph 2; or
- (b) the harvesting of any seeded acreage is not completed on the date determined therefor and the harvesting was prevented by reason of a cause of loss not insured against,

the amount of loss that shall be taken into account in the final adjustment of loss in respect of the total seeded acreage shall be calculated by multiplying,

- (i) the guaranteed production for the damaged or unharvested acreage, as the case may be, or
- (ii) the amount by which the guaranteed production exceeds the potential production for the damaged or unharvested acreage,

whichever is the lesser, by the established price.

(4) Where damaged acreage is not used for any other purpose or the crop thereon is not abandoned or destroyed after the Commission has consented thereto, the amount of loss calculated under subparagraph 3 shall not be taken into account in the final adjustment of loss.

(5) Where the harvesting of any seeded acreage is not completed on the date determined therefor and the harvesting was prevented by reason of one or more of the causes of loss insured against, the amount of loss that shall be taken into account in the final adjustment of loss shall be calculated by multiplying the amount by which the guaranteed production for the unharvested acreage exceeds the production likely to be recovered as determined under paragraph 11 by the established price.

(6) Where, at any time after the 15th day of June, two acres or more of the insured acreage is totally destroyed by hail or tornado, the Commission, upon application therefor in writing by the insured person, may consent in writing to the release from the contract of insurance of the acreage so destroyed and, in such case, the amount of loss shall be calculated by multiplying the guaranteed production for the released acreage by the established price.

STAGE 3

16.—(1) Stage 3 applies to seeded acreage with respect to which harvesting has been completed.

(2) Where the actual production of the acreage so harvested is less than the guaranteed production for such acreage, the amount of loss that shall be taken into account in the final adjustment of loss in respect of the total seeded acreage shall be calculated by multiplying the difference between the guaranteed production and the actual production by the established price.

FINAL ADJUSTMENT OF LOSS FOR
TOTAL SEEDED ACREAGE

17. The indemnity payable with respect to the total seeded acreage in the final adjustment of loss shall be the sum of all Stage 1, Stage 2 and Stage 3 loss calculations applicable to such acreage, but where,

- (a) the actual production of any harvested acreage; or
- (b) the potential production of any unharvested acreage,

exceeds the guaranteed production of such acreage, the indemnity otherwise payable shall be reduced by the amount obtained by multiplying such excess by the established price.

INCORRECT ACREAGE IN FINAL
ACREAGE REPORT

18.—(1) Where the actual seeded acreage of corn in a crop year is less than the seeded acreage declared on the final acreage report, the guaranteed production and the amount of insurance shall be reduced proportionately.

(2) Where the actual seeded acreage of corn in a crop year exceeds the seeded acreage declared on the final acreage report, the total guaranteed production per acre shall remain unchanged.

IN WITNESS WHEREOF The Crop Insurance Commission of Ontario has caused this endorsement to be signed by its general manager but the same shall not be binding upon the Commission until countersigned by a duly authorized representative thereof.

Treasurer's Sale of Lands for Taxes

Each year, municipal and county treasurers compile a list of properties against which taxes are outstanding for at least two successive years, which is a period sufficient to permit sale of the owner's assets to reimburse the municipality. These lists are submitted by the municipal representative to the Queen's Printer and Publisher for publication in THE ONTARIO GAZETTE.

The Gazette is published every Saturday. Tax sale lands are included only in the issue of the first Saturday of each month. Each property is described so that it may be properly identified. Also shown are the amount of tax arrears and costs, and the date, time and place where the sale will be held, which is usually in a public building in the locality. Sales are held three months or later following the date of publication in the Gazette and are subject to a reserve bid equal to the amount of tax arrears and costs.

The previous owner may by law redeem the property any time within one year and one day after the date of tax sale by paying to the municipality all arrears plus costs levied. Where redemption occurs, the municipality reimburses the purchaser of tax sale lands for the amount paid at the sale plus an additional amount to be determined in each case.

If the land is not redeemed in the manner described above, the purchaser at sale, receives from the municipality a tax deed or certificate which should be registered in the appropriate Land Titles or Registry Office. A purchaser should ascertain from either of these offices, information relating to any of the charges or liens against the land and consider the advisability of employing the services of a solicitor to determine the extent, if any, of his liability.

The foregoing applies to tax sale lands which were privately owned. In the event the land is the property of the Crown as represented by the Province of Ontario, only the improvements on the property, such as buildings, may be sold. In this case, an intending purchaser should for his own protection ascertain from the local office of the Department of Lands and Forests whether or not the land or any part can be purchased or leased from the Department. If it cannot, then the purchaser of the improvements would be required to remove them from the land.

In some cases, land advertised for sale in the Gazette may be bought by the municipality, or the owner, prior to sale, may pay the tax arrears and costs. Where this occurs, the land is removed from the tax sale lists.

Treasurer's Sale of Lands for Taxes

Each year, municipal and county treasurers compile a list of properties against which taxes are outstanding for at least two successive years, which is a period sufficient to permit sale of the owner's assets to reimburse the municipality. These lists are submitted by the municipal representative to the Queen's Printer and Publisher for publication in THE ONTARIO GAZETTE.

The Gazette is published every Saturday. Tax sale lands are included only in the issue of the first Saturday of each month. Each property is described so that it may be properly identified. Also shown are the amount of tax arrears and costs, and the date, time and place where the sale will be held, which is usually in a public building in the locality. Sales are held three months or later following the date of publication in the Gazette and are subject to a reserve bid equal to the amount of tax arrears and costs.

The previous owner may by law redeem the property any time within one year and one day after the date of tax sale by paying to the municipality all arrears plus costs levied. Where redemption occurs, the municipality reimburses the purchaser of tax sale lands for the amount paid at the sale plus an additional amount to be determined in each case.

If the land is not redeemed in the manner described above, the purchaser at sale, receives from the municipality a tax deed or certificate which should be registered in the appropriate Land Titles or Registry Office. A purchaser should ascertain from either of these offices, information relating to any of the charges or liens against the land and consider the advisability of employing the services of a solicitor to determine the extent, if any, of his liability.

The foregoing applies to tax sale lands which were privately owned. In the event the land is the property of the Crown as represented by the Province of Ontario, only the improvements on the property, such as buildings, may be sold. In this case, an intending purchaser should for his own protection ascertain from the local office of the Department of Lands and Forests whether or not the land or any part can be purchased or leased from the Department. If it cannot, then the purchaser of the improvements would be required to remove them from the land.

In some cases, land advertised for sale in the Gazette may be bought by the municipality, or the owner, prior to sale, may pay the tax arrears and costs. Where this occurs, the land is removed from the tax sale lists.

Treasurer's Sale of Lands for Taxes
